Overview

Used bookstores introduction

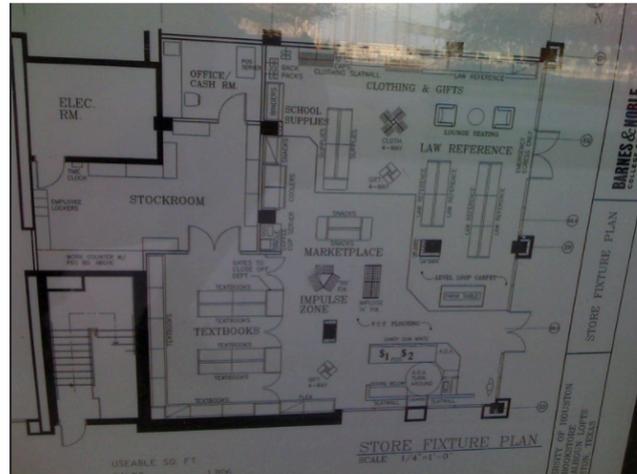

- benefits
 - > accessibility of reading materials that are continually becoming more expensive in retail shops (educators)
 - > environmental concerns (donating books rather than disposign of them)
 - > supporting local economies
- compare/contrast libraries
- differences from chain bookstores

Properties of a Bookstore/Genre Analysis

Properties of a Used Bookstore/Genre Analysis

- key elements
- > why?
- systems of purchasing
- > trade-in, credit
- proposed organization style (genre, dewey decimal, etc)
- other merchandizing
- elements typically excluded
- > why?

Peer Review Questions

1. This is a very rough wireframe for my proposal for a bookstore, but what are your first impressions of what I've created?
2. I'm having trouble deciding how to organize this plan. Any tips on how to arrange things so that it flows naturally?
3. I'm planning a page that's concerned with the color scheme for the bookstore, should I try and implement those colors into the design of this document?
4. Here, I've included (very very) bare-bones sketches of what my floor plan would look like. Are there any softwares or online tools that are good for making easy renderings or better drawings so I'm not scanning in hand drawings?
5. Is it important to reference retail bookstores in my introduction, or should I jump right into talking about used bookstores?
6. I'm not sure if it's enough for me to just design a bookstore space. Do you think it's necessary for me to add a level to the assignment, like redesigning for a COVID-safe space? Perhaps I could make it a redesign for a book reading or kids event?
7. Are there elements missing? Any elements that are unnecessary? Along those same lines, what would you expect to see from a plan of this kind?
